WHAT IS AN ESTATE PLAN?

An Estate Plan is a set of legal documents that allows us to determine guardianship of minor children, provides instructions upon incapacity, and provides for how personal property and assets are distributed upon death. Without such documents in place, the state may be left to make decisions on your behalf. When you create an estate plan, you are providing for your family, giving instructions regarding any type of incapacity, and easing financial burdens. Virginia Frank and her staff have the skill, knowledge, and compassion to help you create an effective estate plan.

THE IMPORTANCE OF ESTATE PLANNING

Without legal estate planning documents in place, the state may be left to make decisions on your behalf. When you create an estate plan, you are providing for your family, giving instructions and guidance regarding your wishes should you become incapacitated, and easing financial burdens.

We understand the very personal decisions involved in crafting an effective estate plan. We will advise you throughout this process to help you achieve the goals and objectives most important to you. We understand that these matters can be stressful, and we do our best to make the process as pain-free as possible, so that you can rest at ease knowing that your legacy is protected and that your loved ones are taken care of.

Congratulations on your adoption!
After your adoption is finalized, don't forget the basics. Plan for the future with some simple estate planning documents.
